Subject: RE: Silverton area surveys in digital format

Liz,

I apologize for not being able to supply the information quickly. This is the very busiest time for us to be completing surveys in Western Colorado. All of our mine claim surveys are in local coordinates, using cardinal north, since all of the claims were originally surveyed and staked using True North. Additionally we use Degrees, minutes, seconds. For me to convert everything to Lat/Longs, NAD 83 and give you information in decimal degrees, is a bit of a task under the time constraints we have. As things clear out, later this fall, maybe I can provide what you are asking.

Regards,

Bob

Hi again Bob,

I was wondering if you had an opportunity to look over the information that we sent over two weeks ago regarding the surveys near Silverton. We are hoping to determine ownership in the areas indicated on the maps attached to the initial email. If you have any additional information, please let us know!

Thank you so much for your assistance.

Liz

Bob,

Thank you for taking the time today to speak with me and Liz. We appreciate any assistance you are able to provide regarding digital surveys. Attached are basic maps showing our areas of interest. The orange polygons represent proposed areas for sampling, but it may be necessary to extend sampling further south towards Howardsville.

Here is the list of the plat maps that were copied from the Assessor's office from Monadnock Mineral Services:

Carbonate King Lode MS 1175

Account #: J07056

Cole Ranch Lot 1& 2, Amended Plat No. 1

Account #: j13031

Forest Queen No. 6-10 MS 18843, Carbonate King Lode MS 1175, Bullion City Loade MS 13825

Account #: J03074

Forest Queen No. 7 MS 18843

Account #: J05070

Any AutoCad files in decimal degrees, NAD 83 that you would be able to provide for the areas on the attached maps will allow us to more efficiently identify property owners for potential access.

Please contact me or Liz with any additional questions or concerns.

Thank you,

John Wieber
